Getting to know the Wild Flowers of East Sussex – Saltmarsh & Shingle Vegetation

Sussex Wildlife Trust

When Sunday 5th July 2015
10am to 4pm

Where
Seven Sisters Country Park

Cost

£42 Non-Members

£30 Members

Description

A guide to understanding and identifying plants typical of coastal habitats.

What we'll do

We start in the Pump Barn, with a short presentation about saltmarsh and shingle vegetation and how these plants are adapted to such harsh conditions. We then explore the Country Park looking for a variety of saltmarsh plants along the river valley. We look at the key features that help them survive in saline habitats and which aid us in their identification. The plants of the shingle ridges on the beach have to endure even more severe conditions and their adaptations are quite surprising. We will keep our eyes out for birds, butterflies and any other wildlife that may be present, particularly along the strand line.

The tutor

Sarah McKenzie & Ralph Hobbs

Suitability and other info

This course is designed primarily for adults; participants aged 14 to 16 years must be accompanied by an adult.

What to bring

Packed lunch and refreshments.
Suitable clothing and footwear for the season.

Access

Please notify us if you have any medical conditions or mobility issues that may affect your attendance on the course.

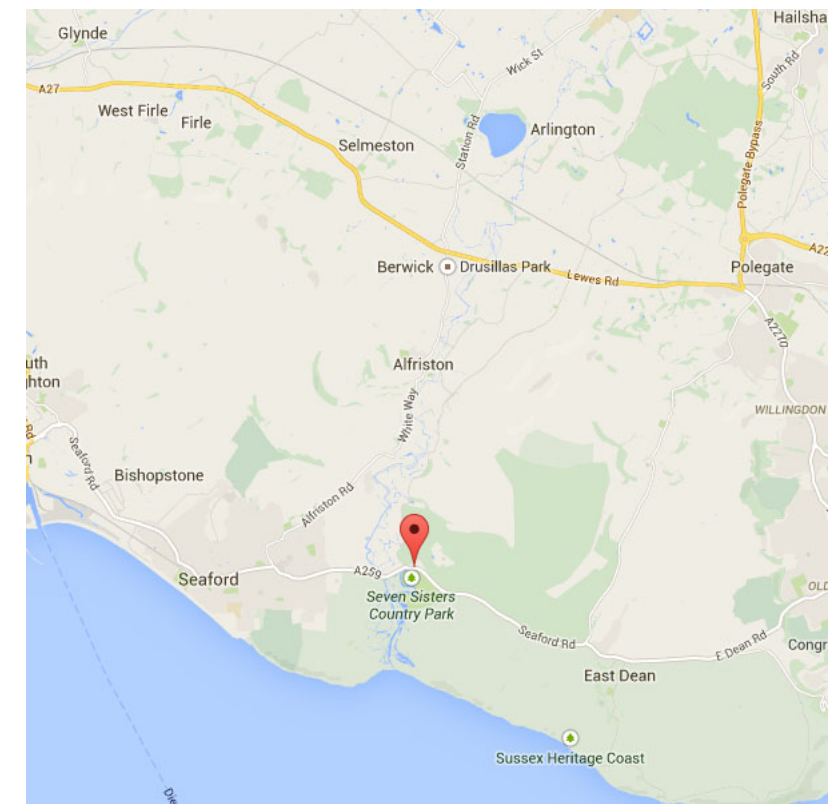

Getting there

The Pump Barn (behind the Visitor Centre), Seven Sisters Country Park, Exceat, nr Seaford, East Sussex, BN25 4AD

Public transport
